

LRD LAYER - PADS

BUILT FOR LONGEVITY
SUSTAINABILITY
QUALITY SHEETS.

Layer pads are used primarily for high volumes to separate layers of products e.g. cans, plastic bottles, glass bottles etc.

The type of layer boards or pads: Solid board packaging or Correx/Coroplast (twin wall) corrugated board packaging.

These layer pads are manufactured from (polypropylene Homopolymer) PPH.

It is a food-friendly material, also light and rigid in structure, strength and chemical resistance. In which it's a beneficial property in packaging materials in the food industry.

LRD Layer-Pads - are hygienic and sterile compared to wood or paper -based dividers due to the reason they do not absorb or keep moisture which is the breeding ground of germs.

LRD Layer-Pads - are cost-effective, reusable and recyclable, this makes them eco-friendly.

Layer-Pads/boards can be made to order a minimum tonnage to be confirmed by our sales.
